Project Title: La Honda Creek Parking and Trailhead Access Feasibility Study – C Sites Amenities & Short-Term Measures

Project Location: La Honda Creek Open Space Preserve

City: La Honda (unincorporated)
County: San Mateo County

Description of Project: The La Honda Creek Parking and Trailhead Access Feasibility Study – C Sites Amenities & Short-Term Measures Project proposes the installation of amenities including benches, equestrian mounting block and hitching posts, and interpretive signage, and repair and installation of gates in the La Honda Creek Open Space Preserve. The new amenities are proposed to be located approximately one mile north of the Preserve’s Sears Ranch parking area and along the Harrington Creek Trail as shown in the attached map. Proposed new benches will be placed at a vista point along an existing fence, just north of an existing corral where the mounting block and hitching posts will be placed for equestrians. The benches and interpretive sign panel will be affixed to the ground with standard footings, requiring some minor digging. No major trenching or soil disturbance is anticipated. Two existing gates will be repaired, and two new ADA self-closing gates will be installed to access the proposed new amenities. The benches are proposed in a location that considers a 250’ preferred bird nesting buffer zone to minimize prolonged human presence that could disturb a nearby known Kestrel nest. All amenities will be installed prior to the nesting bird season.

Name of Public Agency Approving Project: Midpeninsula Regional Open Space District

Name of Person or Agency Carrying Out Project: Same

CEQA Compliance: In accordance with the State CEQA Guidelines, the proposed project is categorically exempt from CEQA under the following sections:

Section 15304 – Minor Alterations to Land: Class 4 consists of minor public or private alterations in the condition of land, water, and/or vegetation which do not involve removal of healthy, mature, scenic trees except for forestry or agricultural purposes. The proposed amenities will be installed and placed in an area that is vegetated with grasses. The project involves minimal trimming to existing vegetation to accommodate the new benches and interpretive sign panel.
