Las Lomitas School District

Measures

“...and all funds staying local?”

Full Text

The following is the full proposition presented to the voters by the Las Lomitas Elementary School District.

“To repair and improve aging schools to protect quality academic education with funding that cannot be taken by Sacramento, shall Las Lomitas Elementary School District build classrooms for increased student enrollment, update/replace aging classrooms to meet current health/safety codes, renovate heating/electrical systems to save money, support 21st century instructional technology, acquire, repair, construct sites, facilities, equipment by issuing $60,000,000 in bonds at legal rates, with citizens’ oversight, no money for administrators, and all funds staying local?”

PROJECT LIST

The Board of Trustees of the Las Lomitas Elementary School District evaluated the District’s urgent and critical facility needs, taking into consideration safety issues, enrollment growth, other neighborhood schools, target class sizes, infrastructure needs and information technology, in developing the scope of projects to be funded. The District made both demographic projections and facilities evaluations and received public input on both. The District also prepared a Master Facilities Plan which was approved by the Board on February 13, 2013 and which is incorporated herein and on file at the District’s Superintendent’s Office. Teachers, staff, community members and the Board have prioritized the key needs including getting the buildings current with health and safety regulations. The Board concluded that if these needs are not addressed now, the problems will only get worse and cost will increase if not addressed now.

Therefore, in approving this Project List, the Board of Trustees determines that:

(i) every penny of this measure must benefit local schools, be controlled locally and cannot be taken away by the State; and

(ii) any measure must be subject to citizen oversight and annual audits to keep the District accountable for how funds are spent; and

(iii) in responding to 40% enrollment growth during the last ten years by upgrading both Las Lomitas Elementary School and La Entrada Middle School, priority must be given to relieving overcrowding and protecting the quality of instruction in core subjects like math, science, reading and writing; and

(iv) the District should provide all students access to similar safe, and modern classrooms and to 21st Century science labs; and

(v) the District should reduce operating costs by improving energy efficiency when repairing and replacing old buildings and aging heating systems and invest the savings to protect core academics.

The Project List includes the following types of projects:

Relieve School Overcrowding by Adding Classrooms and Repairing and Improving Aging Schools to Accommodate a Growing Student Enrollment

Goal and Purpose: The District’s student population has increased by 40 percent in the last 10 years. To relieve this overcrowding and to be eligible for State and local matching funds, and to enhance educational programs within the District, the District would benefit from the improvement and/or expansion of facilities, such as:

- Construct new two-story classrooms/classroom buildings and remove portable classrooms to accommodate more students and preserve play space.
- Provide additional classrooms to maintain small class sizes.
- Renovate existing classrooms and educational support facilities.
- Accessibility upgrades as mandated by the Division of the State Architect (DSA).

Core School Renovation, Repairs and Upgrades

Goal and Purpose: To maintain school sites comparable to neighboring districts in terms of safety and conduciveness for learning, the District will benefit from the renovation, repair and upgrade of outdated school buildings, including bathrooms, plumbing and sewer lines, classrooms, technology infrastructure, science labs, libraries and equipment, allowing all children to have the resources they need to learn:

- Upgrade classrooms, restrooms, and school facilities so that they comply with current health and safety standards and are accessible for students and adults.
- Replace existing water, sewer and plumbing systems to meet current codes.
- Update electrical wiring to relieve overloaded electrical systems to support new classroom instructional technology.
- Replace older windows, ceilings, heating, ventilation, air conditioning and lighting systems with building code compliant, energy efficient systems, which will save money on operating costs.
- Provide improved, up-to-date classrooms.

District-Wide Instructional Technology For Effective Learning Environment

Goal and Purpose: To make up-to-date classroom instructional technology a part of everyday classroom instruction so that our graduates are prepared to compete in a competitive 21st century job market, and to facilitate student achievement and our tradition of academic excellence:

- Provide the technology infrastructure needed to support 21st Century instruction in safe, up-to-date classrooms and school.
- Upgrade and expand wireless systems, telecommunications, and Internet and network connections, including network servers.
- Upgrade electrical systems and install wireless networks
to support new classroom and instructional technology.

School Health and Safety and Cost-Saving Energy Efficiency Projects

Goal and Purpose: Since good, clean, safe, well-maintained and up-to-date schools help protect and improve local property values and reduce maintenance and operating costs returning more money to the classroom for teachers and academic programs, schools and school sites will benefit from a variety of health and safety projects, such as:

* Make schools safe by removing asbestos, lead paint, mold and hazardous materials.
* Upgrade fire alarm systems which are compatible with local fire department regulations, repair fire safety equipment, add sprinklers and fire safety doors to make students safe in the event of an emergency.
* Replace old and inefficient windows, lighting, irrigation, heating and ventilation systems which waste money and use the savings to prevent cuts to instructional programs.
* Replace/upgrade existing security systems.
* Install energy efficient systems, including solar panels, to save money and return the savings to the classroom.

* * *

The listed projects will be completed as needed. Each project is assumed to include its share of furniture, equipment, architectural, engineering, and similar planning costs, program management, staff training expenses and a customary contingency, and escalation for unforeseen design and construction costs. In addition to the listed projects stated above, the Project List also includes the payment of the costs of preparation of all facility planning, facility assessment reviews, environmental studies, construction documentation, inspection and permit fees, and temporary housing of relocated District activities caused by bond projects. The upgrading of technology infrastructure includes, but is not limited to LCD projectors, servers, switches, routers, modules, sound projection systems, laser printers, digital white boards, document projectors, upgrade voice-over-IP, call manager and network security/firewall, and financial reporting software. The repair of school facilities includes the upgrading/expanding school site parking, utilities, multi-use rooms, grounds, playground equipment, hard court surfaces, site acquisition, site paving, shade structures for student assembly and protecting students from inclement weather during lunch, expanding lunch areas, science labs, libraries and District support facilities, upgrading courtyard spaces, build new art and multi-use buildings, athletic and play fields and turf may be upgraded for safety and operational efficiency, demolition of existing facilities, upgrade administrative and support space, roof replacement, upgrade student drop-off areas, eliminate dry rot, painting, carpet replacement, install security systems and fencing, improve interior and exterior floor covering, doors, drinking fountains, portable classrooms, gyms, kitchens and music rooms, and improvements to the District administrative sites and facilities. The Project List also includes the refinancing of any bridge loans taken to initiate voter approved projects. The allocation of bond proceeds may be affected by the final costs of each project. Depending on final costs, the District may not be able to complete some of the projects listed above. The budget for each project is an estimate and may be affected by factors beyond the District’s control. The final cost of each project will be determined as plans are finalized, construction bids are awarded and projects are completed. Based on the final costs of each project, certain of the projects described above may be delayed or may not be completed. Demolition of existing facilities and reconstruction of facilities scheduled for repair and upgrade may occur, if the Board determines that such an approach would be more cost-effective in creating enhanced and operationally efficient campuses. Some projects, such as fields, libraries, physical education facilities may be undertaken as joint use projects in cooperation with other local public agencies. Necessary site preparation/restoreropation and landscaping, may occur in connection with new construction, renovation or remodeling, or installation or removal of relocatable classrooms, including ingress and egress, removing, replacing, or installing irrigation, utility lines, trees and landscaping, redirecting fire access, and acquiring any necessary easements, licenses, or rights of way to the property.

Bond proceeds shall be expended only for the specific purposes identified herein. Proceeds of the bonds may be used to pay or reimburse the District for the cost of District staff when performing work on or necessary and incidental to the bond projects. The District shall create an account into which proceeds of the bonds shall be deposited and comply with the reporting requirements of Government Code § 53410.

FISCAL ACCOUNTABILITY: IN ACCORDANCE WITH EDUCATION CODE SECTION 15272, THE BOARD OF TRUSTEES WILL APPOINT A CITIZENS’ OVERSIGHT COMMITTEE AND CONDUCT ANNUAL INDEPENDENT AUDITS TO ASSURE THAT FUNDS ARE SPENT ONLY ON DISTRICT PROJECTS AND FOR NO OTHER PURPOSE. THE EXPENDITURE OF BOND MONEY ON THESE PROJECTS IS SUBJECT TO STRINGENT FINANCIAL ACCOUNTABILITY REQUIREMENTS. BY LAW, PERFORMANCE AND FINANCIAL AUDITS WILL BE PERFORMED ANNUALLY, AND ALL BOND EXPENDITURES WILL BE MONITORED BY AN INDEPENDENT CITIZENS’ OVERSIGHT COMMITTEE TO ENSURE THAT FUNDS ARE SPENT AS PROMISED AND SPECIFIED. THE CITIZENS’ OVERSIGHT COMMITTEE MUST INCLUDE, AMONG OTHERS, REPRESENTATION OF A BONA FIDE TAXPAYERS ASSOCIATION, A BUSINESS ORGANIZATION AND A SENIOR CITIZENS ORGANIZATION. NO DISTRICT EMPLOYEES OR VENDORS ARE ALLOWED TO SERVE ON THE CITIZENS’ OVERSIGHT COMMITTEE.

NO ADMINISTRATOR SALARIES: PROCEEDS FROM THE SALE OF THE BONDS AUTHORIZED BY THIS PROPOSITION SHALL BE USED ONLY FOR THE ACQUISITION, CONSTRUCTION, RECONSTRUCTION, REHABILITATION, OR REPLACEMENT OF SCHOOL FACILITIES, INCLUDING THE FURNISHING AND EQUIPPING OF SCHOOL FACILITIES, AND NOT FOR ANY OTHER PURPOSE, INCLUDING TEACHER AND SCHOOL ADMINISTRATOR SALARIES AND OTHER OPERATING EXPENSES.
Impartial Analysis of Measure S

Education Code Section 15100 authorizes a school district to issue bonds for specified purposes. However, the voters must first approve the issuance of the bonds at an election. Education Code Section 15266 provides the measure passes if 55% of those voting on it vote for the measure.

The Board of Trustees of the Las Lomitas Elementary School District has proposed this measure, which would authorize the District to issue bonds in an amount not to exceed $60 million. The bonds will have an interest rate not exceeding the legal maximum and will mature in a maximum of 25 or 40 years from the date of issuance of the bonds, depending on how the bonds are issued. The District’s best estimate of the average tax rate levy per year per $100,000 of assessed valuation to fund this bond is $30.00 for fiscal year 2014-2015 and also for fiscal year 2020-2021. The District’s best estimate of the highest average tax rate levy per year per $100,000 of assessed valuation to fund this bond is $30.00.

The California Constitution requires the listing of specific school facilities projects to be funded from the bond revenue and certification that the Board has evaluated safety, class size reduction, and information technology needs in the development of that list. The District’s “Project List” for the proposed bond is attached to the full text of the measure and lists four general types of projects: relieving school overcrowding by adding classrooms and repairing and improving aging schools to accommodate growing student enrollment; core school renovation, repairs, and upgrades; improving district-wide instructional technology; and improving health and safety and energy efficiency. These categories include specific improvements such as constructing new classrooms and buildings, removing portable classrooms, preserving play space, renovating facilities, improving accessibility, replacing building systems (water, sewer, and plumbing), updating electrical systems, providing technology infrastructure, upgrading and expanding telecommunication and Internet systems, removing environmental hazards (asbestos, lead paint, and mold), upgrading fire alarm systems, repairing fire safety equipment, replacing and upgrading security systems, and installing energy-efficient systems. The Project List should be reviewed for further specifics.

The California Constitution and Education Code require the District to take certain steps to account for the proceeds from the sale of the bonds. The District will direct the funds to be deposited into a special account, appoint a citizens’ oversight committee, conduct annual independent performance and financial audits to assure that funds are spent only on the listed improvements and for no other purposes, and prepare annual reports listing the amount of funds collected and expended and the status of any funded project.

A “yes” vote on this measure would authorize the Las Lomitas Elementary School District to issue bonds in an amount not to exceed $60 million for the purposes listed in the “Project List.”

A “no” vote would preclude the Las Lomitas Elementary School District from issuing the bonds.

This measure passes if 55% of those voting on the measure vote “yes.”
Las Lomitas School District
Arguments in support of or in opposition to the proposed laws are the opinions of the authors.

<tbody>
<tr>
<td>Protect the outstanding education children receive at Las Lomitas Elementary School and La Entrada Middle School. <strong>VOTE YES on Measure S.</strong></td>
</tr>
</tbody>
</table>

In 2001 when voters approved the last bond to modernize our neighborhood schools, all school improvement projects were completed on time and within budget. Today (12 years later) student enrollment has increased by over 40% and our two schools need more classrooms. Twenty percent of our children go to school in portables. At La Entrada the entire fifth grade attends class in portable classrooms.

Measure S will:
- Replace portables with new two-story permanent classrooms to maintain small class sizes and accommodate rapid growth in student enrollment
- Invest in modern instructional technology and equipment to protect academic instruction in core subjects like math, science, reading and writing
- Bring facilities up to current health and safety code standards
- Upgrade classrooms and learning spaces with science and technology capabilities
- Make both campuses accessible for disabled children
- Repair or replace old buildings and systems to save significantly on utility bills.

Every penny of Measure S will be locally controlled to improve Las Lomitas and La Entrada school facilities and technology. By law these funds cannot be taken away by the State.

**Taxpayer protections are REQUIRED.** No funds can be spent on administrators’ salaries or pensions. Only facilities, technology and equipment upgrades are allowed. An independent citizens’ oversight committee will ensure all funds are spent properly.

Measure S is a smart investment. Good schools protect property values and keep our community strong.

Join local teachers, parents, and civic leaders and vote yes to support quality schools, maintain property values, and ensure that our children get the highest level of education possible so they can thrive in high school and beyond.

**Please VOTE YES on Measure S.**
